HARDY PLANTS
A Complete Collection
1928

Grown by

FRANK JOSIFKO
MADISON - - - CONNECTICUT
FOREWORD

I N PRESENTING this, the Sixth Edition, of my catalogue, I do so with reasonable confidence in the quality of the stock I am growing and offering. My catalogue embraces a most complete and select assortment of the choicest varieties of plants suitable for distinctive and uncommonly beautiful perennial borders and charming rock gardens. The varieties offered have been selected with discrimination and care. They have been grown here in Madison under conditions which assure their reasonable hardiness and adaptability to our climate.

To my customers and friends of years past, such assurances are unnecessary; to new clients I can only repeat my pledge of former years to the effect that I shall always endeavor to have my stock measure up to the high standard of quality I have set for it, and by so doing to merit a continuance of the patronage I have always enjoyed. I value, as my greatest asset, the patronage of the host of satisfied clients, who, year after year, entrust to me the commissions for their requirements in making their home "A place of beauty and joy forever."

Read Before Ordering

This list cancels all previous offers.

PRICES quoted in this list are net, and subject to no discounts. My prices are as low as the high quality of my stocks warrants and are consistent with the prices of other reputable firms. QUALITY must be considered in comparing prices.

ORDERS. To avoid disappointments we urge orders being placed early. All plants are offered subject to being unsold on receipt of order. Please give explicit shipping directions. Write your name and address distinctly.

TERMS. Cash with order. Any orders involving other terms must be accompanied by satisfactory references.

C.O.D. ORDERS must be accompanied by a remittance in part payment to guarantee charges. All such orders can only be shipped by express.

SMALL ORDERS. We do not solicit orders for less than $1.00 and such orders will not be filled unless an allowance for packing be made. Packing charges are made at actual cost.

SUBSTITUTIONS. Unless specifically authorized to do so, no substitutions are made. We suggest, however, that we be instructed to use our judgment in such cases, as often, as the season advances, we may be sold out on some varieties, but we may still have equally choice items available which will prove as good as—and often superior to—the varieties ordered and which cannot be supplied.

RISK. Shipments travel at purchaser's risk. Our responsibility ceases upon delivery to the transportation company and when we have their receipt for shipment.

ERRORS. Keep an exact copy of your order. We endeavor to fill all orders correctly. When we are at fault we will make satisfactory adjustment.

NON-WARRANTY. We grow and ship only the best and healthiest plants, but we cannot give any warranty as to description or trueness to name, as conditions, climatic and soil, exist over which we have no control.
HARDY PERENNIALS  
FRANK JOSIFKO

**Anchusa Myosotidiflora**

**Hardy Perennials**

   Atamasco. "Atamasco Lily; Fairy Lily." Pink and white flowers. Not hardy.

ANNUALS AND BEDDING PLANTS

In addition to my complete list of perennials and rock plants, I also grow a very large variety of annuals and bedding plants. These will be found most useful and effective in beds and borders, to supplement the feast of summer bloom in the home grounds. These are available—as long as they last—at lowest market prices.

Among them are—Ageratum, Begonia, Calendula, Centaurea, Chinese Asters, Chrysanthemum, Cobaea, Cosmos, Geranium, Heliotrope, Lantana, Lobelia, Lemon Verbena (Aloysia), Marguerites, Marigold (tall and low, or French), Salpiglossis, Salvia, Scabiosa, Summer Ivy, Verbena, Vinca, variegata from pots, Zinnia in colors or mixed, and many others.

All Bedding Plants here mentioned and those not mentioned have been at least once transplanted and grown in coldframes to insure their hardiness.

Illustrated and printed by Hartland Adv. Service, 154 Nassau Street, New York
LANDSCAPE WORK

A life time experience—in all about 40 years—in laying out and remodelling of estates in America, as well as abroad, has given me a profound knowledge of the artistry and requirements for work of this kind. I have also received many awards for garden models at different exhibitions, amongst which were two FIRST PRIZES for miniature models at the First International Flower Show, Grand Central Palace, New York City, 1913.

Our expert advice will assure satisfactory results.

ADDITIONAL UNCATALOGUED VARIETIES

Besides the galaxy of delightful and exquisite plants mentioned in the foregoing lists, I am constantly trying out many additional varieties for hardiness as well as other merits. The quantities of these, available, are limited and do not warrant listing. In this newer and rare collection you may find some rare favorites you may be anxious to obtain and if you will kindly let me know your wishes, giving some indication of your requirements, it is not only possible, but probable, I may have the desired plants to complete the enjoyment of your "Garden of Desire."

LOCATION. Our Nursery is located on main Boston Post Road 1 1/2 miles east of Madison, or 3 miles west of Clinton, on the edge of State Park (Shore).

VISITORS. I am always glad to welcome visitors who are interested in hardy plants. The flowering season starts with the opening of spring and continues until late fall, when a strong frost generally destroys the last of the very late-flowering plants.

CUT-FLOWERS

All through the season you will find a large assortment of flowers suitable for cut-flowers. Many of them are from very rare varieties. Try some. Prices moderate.

FRANK JOSIFKO, Madison, Conn.
